AIRLINE EXPERIENCE

Advised by a Star Alliance veteran.

We're advised and backed by a former senior member of the Star Alliance team, bringing deep airline experience to the decisions we make.

FRONTIER AI CONNECTIONS

We managed Sam Altman's travel.

We've even managed travel for Sam Altman, co-founder and CEO of OpenAI. Our connection to this world began with looking after the people in it.

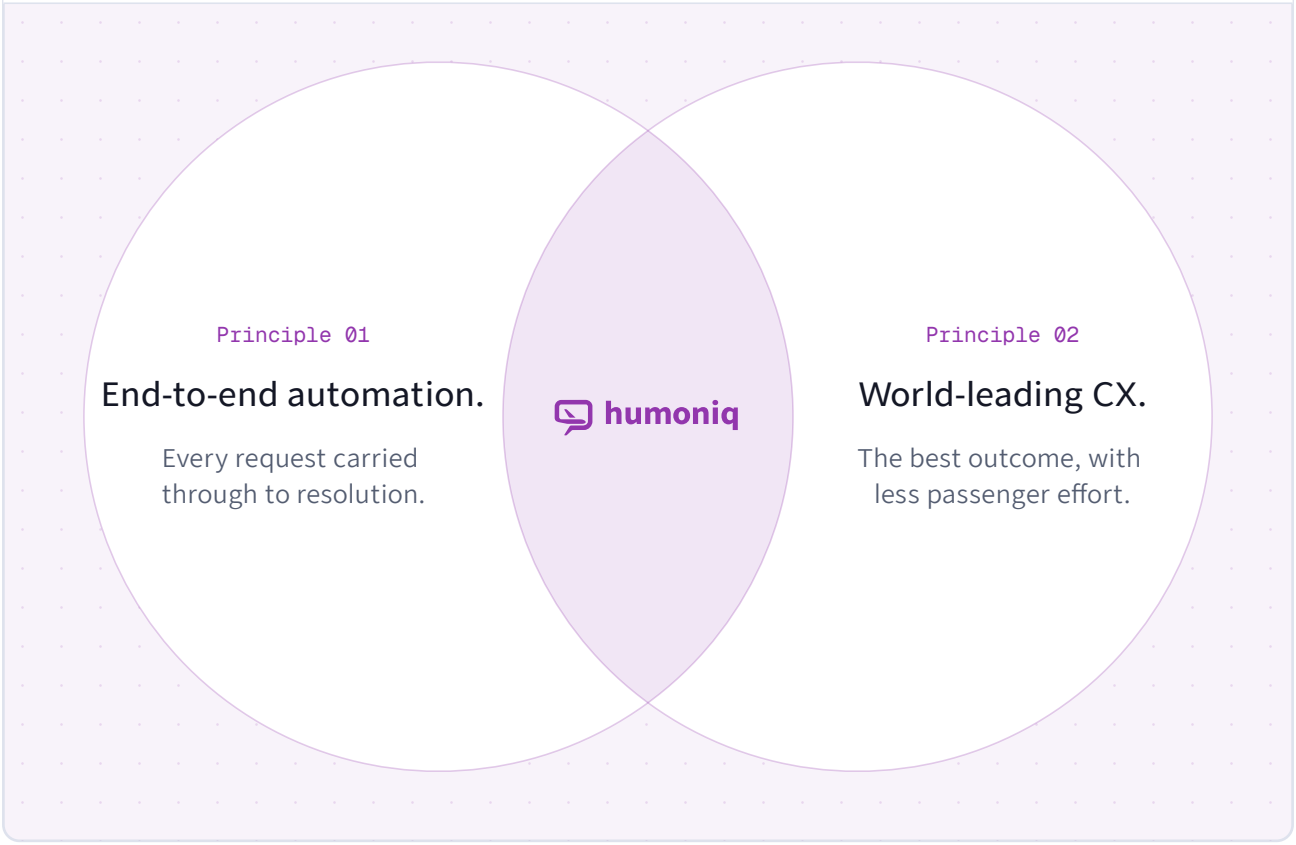

03 / STRATEGY & IDEOLOGY

World-leading CX.

Automated end to end.

Most airline AI delivers far less than the technology makes possible. We start with what passengers actually want, then build end-to-end automation that makes the experience materially better.

We build where both principles meet.

OUR MANIFESTO

Who else goes this deep on air travel CX?

An entire manifesto. Seven convictions. Built from years of solving complex air travel problems.

07 Why work with us?

04 / WHAT WE OFFER

Airline customer support.

Over chat, email and phone.

We resolve everyday requests and manage major disruptions, proactively contacting and rebooking affected passengers. We also reach out to prevent travel problems and make relevant offers, carrying every conversation through to action in your airline's systems.

05 / IDEAL PARTNERS

Are we right for you?

... and you for us?

We want airline teams excited by what AI makes possible and impatient to build it. That isn't everyone, and that's okay. With the right team, we'll commit fully and do breakthrough work together.

What we bring	What we look for
01 **A track record in air travel.** Air travel companies built since 2011. Complex cases firsthand. Agentic AI in production.	01 **Excitement about AI.** Respect the risks. Plan for them rigorously. Be energized by the possibilities.
02 **An obsession with CX.** Decades of testing and questioning the experience, with world-leading CX as a core principle.	02 **Ambition to lead.** Set the standard others chase. Back that ambition with the decisions it takes.
03 **Unrivaled commitment.** Your airline gets our core team's full energy, care and thought. We guarantee that commitment.	03 **Commitment to speed.** Make decisions quickly. Remove blockers. Build, test and improve with urgency.
